**Adresse :** Institut Curie, Centre de Recherche, Bâtiment C. Lhomond, 12, rue Lhomond 75005 PARIS

**Site :** <https://curie.fr/unite/umr144>

**Descriptif :** The 14 teams currently hosted at the UMR 144 are conducting research that covers various aspects of cell biology and cancer cell biology, including intracellular transport, cytoskeletal dynamics, cell division and migration, cell differentiation, morphogenesis, and cell signaling. The general scientific objective of these teams is to understand the biogenesis of cell compartments, the molecular mechanisms that control normal cell functions and their dysregulation, in particular in cancerogenesis. The unit is part of the scientific domain entitled "Multiscale physics-biology-chemistry and cancer" of the Curie Institute, together with two other units: UMR 168 and UMR 3666, that has been organized to facilitate and strengthen robust scientific interactions between the teams. The UMR 144 is also part of the Laboratory d'Excellence (LABEX) CelTisPhyBio. With the aim to clarify the scientific identity, the management proposes to rename the research unit as: Cell Biology and Cancer".

**Ecole(s) doctorale(s) de rattachement :** non renseignée

**Rattachée au(x) thème(s) de recherche suivant(s):**

- biologie cellulaire; biologie structurale; genomique; imagerie

**Liens avec d'autres structures :**

Aucun

**Contact:**

**Année de création :** 1995

**Site ESR :**

- Alliance Sorbonne Université, depuis le 01/01/2018

**Classement scientifique ERC :**

- LS4 : Physiology in Health, Disease and Ageing : Organ and tissue physiology, comparative physiology, physiology of ageing, pathophysiology, inter-organ and tissue communication, endocrinology, nutrition, metabolism, interaction with the microbiome, non-communicable diseases including cancer (and except disorders of the nervous system and immunity-related diseases))

- LS3 : Cellular, Developmental and Regenerative Biology : Structure and function of the cell, cell-cell communication, embryogenesis, tissue differentiation, organogenesis, growth, development, evolution of development, organoids, stem cells, regeneration, therapeutic approaches
