---

**Adresse :** Institut Curie, Centre de Recherche, 26, rue d'Ulm 75248 PARIS

**Site :** <https://science.curie.fr/recherche/biologie-interactive-des-tumeurs-immunologie-environnement/immunite-et-cancer/>

**Descriptif :** The main topics addressed by the unit support an integrative research program focused on tumor biology and immunology. The common objective of the teams is to gain a better understanding of the basic molecular and cellular mechanisms that underlie immunity, by analyzing critical molecular and cell biological mechanisms of adaptive and innate immune responses.

**Ecole(s) doctorale(s) de rattachement :** non renseignée

**Rattachée au(x) thème(s) de recherche suivant(s):**

- Cell biology of antigen presentation and role of epigenetic regulation in immune cell development.
- Intracellular trafficking and innate immune response (HIV infection).
- Role of mechanical force and the T cell antigen receptor in controlling T lymphocyte function.
- MAIT cell biology and CD4 T cells in cancer.
- Molecular processes regulating cell motility and function of Dendritic cells and B lymphocytes.
- Key molecular processes that control antiviral immunity.
- Tumour immunology and the characterisation of the immune microenvironment in tumour-draining lymph nodes.
- Properties of extra-cellular vesicles (ECVs) and their role in cancer.

**Classement scientifique ERC :**

- LS2 : Integrative Biology: from Genes and Genomes to Systems : Genetics, epigenetics, genomics and other 'omics studies, bioinformatics, systems biology, genetic diseases, gene editing, innovative methods and modelling, 'omics for personalised medicine

- LS4 : Physiology in Health, Disease and Ageing : Organ and tissue physiology, comparative physiology, physiology of ageing, pathophysiology, inter-organ and tissue communication, endocrinology, nutrition, metabolism, interaction with the microbiome, non-communicable diseases including cancer (and except disorders of the nervous system and immunity-related diseases)
- LS3 : Cell Biology, Development, Stem Cells and Regeneration : Structure and function of the cell, cell-cell communication, embryogenesis, tissue differentiation, organogenesis, growth, development, evolution of development, organoids, stem cells, regeneration, therapeutic approaches
- LS6 : Immunity, Infection and Immunotherapy : The immune system, related disorders and their mechanisms, biology of infectious agents and infection, biological basis of prevention and treatment of infectious diseases, innovative immunological tools and approaches, including therapies
- LS1 : Molecules of Life: Biological Mechanisms, Structures and Functions : Molecular biology, biochemistry, structural biology, molecular biophysics, synthetic and chemical biology, drug design, innovative methods and modelling
