**Adresse :** 8 rue du Général Sarrail 94010 Créteil

**Site :** <https://www.imrb.inserm.fr/equipes/s-lanone/>

**Descriptif :** The general scientific objective of GEIC2O team is to understand the interplay between genetic and environmental factors in the development of lung diseases throughout the life (namely from children to adults). We particularly focus on lung diseases of non-genetic (Chronic Obstructive Pulmonary Disease or COPD) and genetic (Cystic Fibrosis and surfactant disorders) origins. The large pluridisciplinarity of GEIC2O team staff comprising MD (lung specialists – adult and pediatricians, occupational medicine, geneticists, ear/nose/throat specialists, and lung pathologist) as well as PhD (in cellular and molecular biology, biochemistry, genetic, bioinformatics and respiratory physiology) allows us to develop a comprehensive scientific approach ranging from in vitro experimental work to preclinical models and patient cohorts.
